

**Help LPR Park Friends Stop
2nd LOGGING of the Little Plover River Park
Please Come Tomorrow**

**Wednesday, JULY 13, 6 PM
Village of Plover Special Meeting
to hear our concerns and Village Board vote**

Village of Plover Municipal Building
2400 Post Road, Plover 54467

This was not just a "thinning" or removal of a few diseased trees. . . this was a major logging of this unique, diverse, forested Urban Park with a Class 1 Trout Stream flowing through it

Concerns/Questions/Suggestions

- The devastation of the Park's Bird Habitat during the NESTING season, a major violation: Kent Hall, Bird City rep., UWSP Professor
- Village of Plover response to our questions and wish list
- Stop 2nd Logging: Parks are not for "timber production" nor are they for the "growing of a commercial crop"
- Better communication between Village and residents
- Forestry and logging DNR/Federal Best Management Practices not followed
- Invasive threat to our Park is already happening
- Formation of LPR Park Friends and Mission Statement
- Importance of maintaining biodiversity for wildlife habitat

SEE YOU TOMORROW

You can see the questions and wish list the Little Plover River Park Friends submitted to the Village and the Villages response to the Wish list here:
